

Easy Order Print is a simple application that sends newly created WooCommerce orders directly to a Thermal Printer or any other printer.

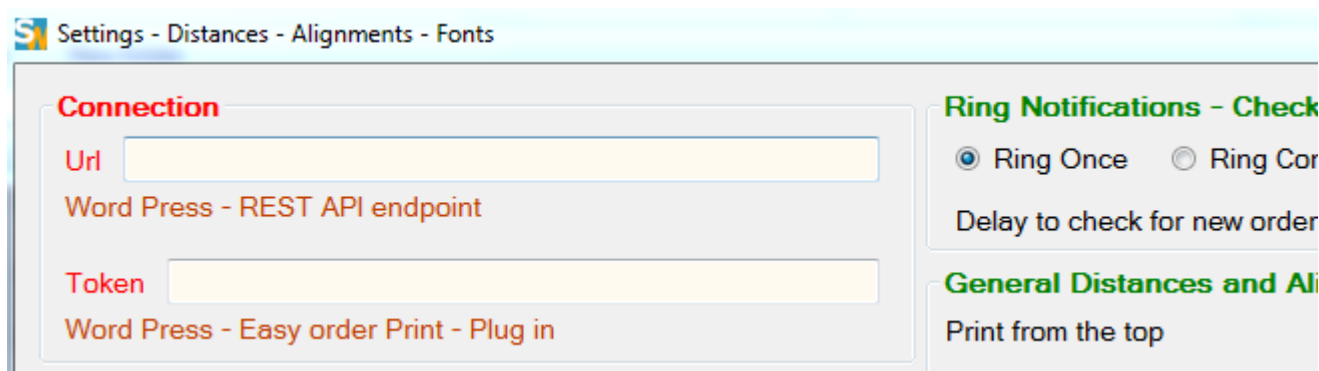

For testing you can use **PDF Virtual printer**  
Note: Application use the Default printer of your system

1. UnZip the file **Easy\_Order\_Print\_woo\_vx.x.x.zip**

You will get the application Easy Order Print and Word Press plug in

2. Install the plug in at your Word Press – Woo Commerce need to be installed
3. Go to menu Setting → EasyPrint and get your API **Token** (You are able to Change it)
4. Run the application by using Easy Print.exe and Press **settings**
5. Put there your API **Token** and your Word Press **REST API endpoint**

Rest API endpoint → <https://my-word-press.com/wp-json/easy-order-print-woo/orders>

6. In the folder you will find also two Images **application\_logo.jpg** and **logo\_to\_print.jpg**.  
You can modify them and sent to us. We will put them under your account and application will use these images in printing and at main screen of the application.

Please don't hesitate to request support for your demo installation. We will be happy to assist you.

We can customize the application based on your needs
